1. Fund the Florida Education Finance Program (FEFP) fully, and create a separate categorical for Family Empowerment Scholarships.

2. Continue to de-regulate traditional public schools and provide school districts flexibility and autonomy that is comparable to other school choice options.

3. Support efforts to recruit and retain high-performing teachers and other employees by reducing overly burdensome certification and endorsement requirements.

4. Support legislation that ensures adequate time and funding to implement new state requirements with fidelity, such as greater flexibility to implement school safety requirements that require changes to physical buildings, new equipment, related procedures, and employee training.
